

# Summer Reading Programs

The Department of Energy and Environmental Protection's State Parks Division is happy to announce its programs for this summer reading. We are offering two books to choose from based on the theme you may be following. Each includes a book with interactive storytelling followed by exploration of natural objects.

There is a take home craft included that relates to the topic of the story.

## Unearth a Story

What if you found a fossil on a hike?

More importantly, what if it came to life?

Write your own story as we unearth a variety of fossils during the adventures of a young hiker. We will bring some real fossils and explain about Connecticut's state fossil and dinosaur. You will be able to make a Dinosaur Track Book to take with you and help inspire some adventures of your own.

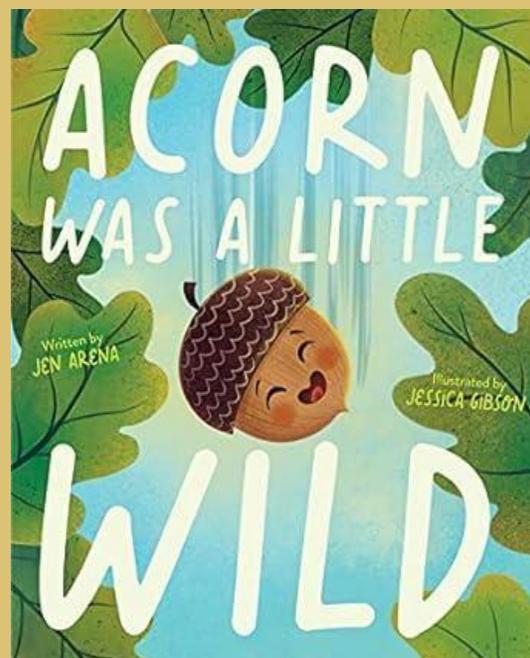

Age range: Preschool to grade 4.

## Plant a Seed

Explore the world with Acorn and his wild outlook, until he hits a hard place and has to adjust his speed. Through this book we will introduce the diversity of seeds and how they get a round and into the ground.

Program includes a collection of seeds to explore. Compare them and then design your own seed for travel using one of the four methods available: air, water, animals, or ejection.

Age range: Preschool to grade 4

Schedule a program to come to you this summer, July - September by contacting

[Susan.quincy@ct.gov](mailto:Susan.quincy@ct.gov) or call 203-734-2513.

Programs are available for Tuesday through Saturday during the day or early evening hours. The fee is 70.00 per program and can provide for up to 20 children. Can be indoors or outdoors.
